BETTER BLOOMING BULBS  
**HEBERLING'S GLADIOLUS**  
CORN BELT GROWN

J. H. Heberling

Easton, Illinois, U. S. A.

J. S. Heberling

**FALL PRICE LIST --- September 1, 1940**  
**Tulips - Regal Lilies - Gladiolus**

Our complete Gladiolus catalog will be out about October 15th. Some varieties are not grown in large quantities and hence suggest early orders. All stock quoted herein is subject to prior sale.

TERMS: CASH with order or C.O.D.

**TULIPS**

Prepaid Delivery Charges (delivery free)

Tulip prices are higher this season because of the small supply. No Holland tulips can be secured this season and all offerings of tulips will undoubtedly be sold out very early this season. Twenty-five bulbs of the same size and variety may be purchased at 100 rate. Should we be sold out of the large size when ordered we will ship a larger quantity of the No. 2 bulbs unless advised not to do so.

**PLANTING**

Plant in September, October, or any time before freezing winter weather. They give best results when fall-planted because they are early spring blooming. Tulips will thrive in any good soil. If fertilizer is used do not place touching the bulb. Below the bulb with an inch of soil on top is a good location for your fertilizer. Plant so that bulb is covered with four inches of soil. Tulips will do best where they have sunshine at least half of each day.

**SIZES**

The large size bulbs called No. 1 are from 11½ to 13 cm. in circumference.

Size 2 bulb are 10½ to 11 cm. in circumference.

The No. 1 bulbs are used mostly for forcing under glass but for outdoor planting you will find the No. 2 bulbs giving excellent results. It is not likely that there will be any difference in the length of the stem or the size of the flower from either No. 1 or No. 2 bulbs grown out-of-doors. Both should make fine flowers.

**DARWIN TULIPS**

The tall, late varieties that are so much admired. Blooming in this latitude about April 20th, sometimes later. Not all Darwin tulips bloom at exactly the same time. There is a difference in varieties.

**COTTAGE TULIPS**

These are large, tall tulips, a little earlier than the Darwins.

**TRIUMPH TULIPS**

Triumphs are a cross between the Darwins and the earlier varieties and are not quite so tall as the Darwins, but have very large flowers and are a little earlier than Darwins.

**LILY-FLOWERING TULIPS**

Rather late as to blooming time, blooming when the Darwins do, but producing a lily-shaped flower that is very beautiful and attractive.

	Per Size	Each No. 1	Each No. 2	Ten No. 1	Ten No. 2	100 No. 1	100 No. 2
<b>BARTIGON</b> , Very large striking Darwin of rich crimson scarlet. 24 to 26 inches tall.	\$ .10	\$ .08	\$ .80	\$ .60	\$6.00	\$4.50

<b>WILLIAM PITT</b> , Darwin. Very large tulip of deep crimson with blue star on white base 26 inches tall.	.10	.08	.80	.60	6.50	5.00	

**REGAL LILIES --- The most popular of all American Lilies.**

The most popular of all American Lilies. Large, white and very fragrant. This lily is hardy in most climates including latitude of Illinois and states farther north. The greatest danger of frost is in the spring after they start growth and are up; then, sometimes, a freeze will injure them. This can be avoided by mulching the ground after it freezes in winter. This will delay the early spring growth. Plant smaller bulbs 4 inches deep and larger 6 inches.

## MASTER MYRON (Our 1939 Introduction)

An immense medium-red self-color. Florets of heavy substance, five to five and one-half inches in diameter. Twenty to twenty-six buds per spike and five to seven open. Makes large spikes from No. 5 or No. 6 bulbs and the greatest commercial red we have ever seen. Spikes from 48 inches to 64 inches in height. We have received much praise from our customers of this variety this season. Will print some of it in our October catalog. This variety has proven better than we promised in our catalog last season. You will all buy it sooner or later.

### BULB PRICES

Per -- each -- \$1.00    ten -- \$9.00    100 -- \$80.00
